Mild	<ul style="list-style-type: none">• Quick Relief Neem Shampoo, Smelly Pet Shampoo or Skunk Off,• Follow with Aloe Re-Moisturizer, Coat Conditioner, Sheamora or Plum-Tastic		

How to Use the Products:

Step 1	Use a mixing bottle and dilute as per the instructions on the bottle. For the most severe cases, do not dilute.
Step 2	For best results, apply directly to the dry coat. Massage the diluted shampoo gently onto the coat, make sure to apply the product to all parts of the animal including the armpits, between toes, stomach, and other hard to reach places (do not put in eyes, mouth or ears).
Step 3	Let the product sit on the coat for at least 15 minutes before rinsing. During this time, you can use a rubber curry to massage the product into the skin and coat.
Step 4	Repeat the shampooing process if necessary. Rinse thoroughly and repeat these steps using conditioner. Only dilute the product directly before using. These products are biodegradable after water is added.
Step 5	Following the bath, you can use Odour Terminator by spraying on your own hand and wiping on the affected areas (do not spray in eyes or mouth).
Step 6	It is important to brush and comb your pet between baths to help the skin breath. It is recommended to use the appropriate brush depending on the thickness and

	condition of the coat and skin.
Step 7	After you brush, use a comb to take out tangles and excess coat. Use a fine comb for dogs with thin coats and skin, use a medium to coarse comb for thicker coats.
Step 8	A.O.E wipes can be used to wipe on affected areas of the pet.
Step 9	If any areas in your home, garage, or vehicle were affected, you can use K.O.E by diluting in spray bottle or bucket and applying to these areas.

Important information & tips:

- Dogs are usually sprayed in the eyes and face by skunks, when applying any products to the face, apply to hand or sponge and wipe area, do not spray anything in the eyes.
- It is important to ensure that you are not irritating the skin when you are brushing and combing. If you notice the skin is becoming pink, you should stop.
- Even though your shampoo, conditioner or optimizer may be considered tearless, you should avoid getting any product in your pet's eyes.
